

SPY+

2017

**KEEP DOING WHAT
YOU LOVE, FROM
SURF TO STREET
TO SUMMIT.**

SPY has always been in the business of creating eyewear that keeps you, and us, looking good—and this year is no different. We've developed a bold selection of eyewear featuring our premium Happy Lens™ technology, allowing you to See Better and Feel Better from surf to street to summit.

So grab your friends and rally. Take a leap outside—and way outside your comfort zone—and get after the adventures that have been screaming your name.

WE MEASURE HAPPINESS IN WAVELENGTHS

Happy Lens™ is the only lens on the market that harnesses the beneficial aspects of long-wave blue light while offering protection from short-wave blue light. Let the good rays in and keep the bad rays out with Happy Lens. #SeeHappy

SEE BETTER.

Happy Lens uses long-wave blue light to enhance color, contrast, and clarity—making colors more vivid and your surroundings more defined.

FEEL BETTER.

Long-wave blue light stimulates the brain's production of serotonin, which improves mood, increases alertness, and promotes a healthy circadian rhythm.

HAPPINESS GUARANTEED

Happy Lens™ is a mood-boosting Instagram filter for your eyes. Not satisfied? We'll let you return them for a full refund with proof of purchase—including your initial shipping charges and return shipping—within 14 days.

**STANDARD
LENS**

HAPPY LENS™

- + Accentuates Terrain Changes
- + Enhances Color and Contrast
- + Increases Clarity, Putting Objects in Sharper Focus
- + Improves Alertness

WHAT THE TECH?

LOCK STEADY™

The quickest, fingerprint-free lens change system on the market—allowing you to adapt to changing light and weather conditions at the touch of a button.

FEATURED GOGGLE:
DOOM

QUICK DRAW

Utilizing a sliding lever to swiftly release an injected cylindrical SIC™ lens, Quick Draw gives you the upper hand to duel with ever-changing weather conditions on the fly.

FEATURED GOGGLE:
ACE

HAPPY LENS™

Color and contrast enhancing lens allows you to easily see changes in terrain. Also lets in the sun's good rays that science suggests create an uplift in mood and awareness while still blocking all of the bad rays.

ANTI-FOG LENS

A super-secret, extra-strength coating on the inside keeps your lenses clear, all day long.

FEATURED GOGGLE:
MARSHALL

SCOOP®

SPY's patented ventilation system combats lens fogging by promoting airflow between the lens and the face.

ARC® LENS

Decentered (thicker in middle and tapered toward edges) to provide optically correct, distortion-free viewing at all angles.

3X ISOTRON™ FACE FOAM

Constructed of three different densities of material, it features SPY's moisture-wicking Dri-force™ fleece.

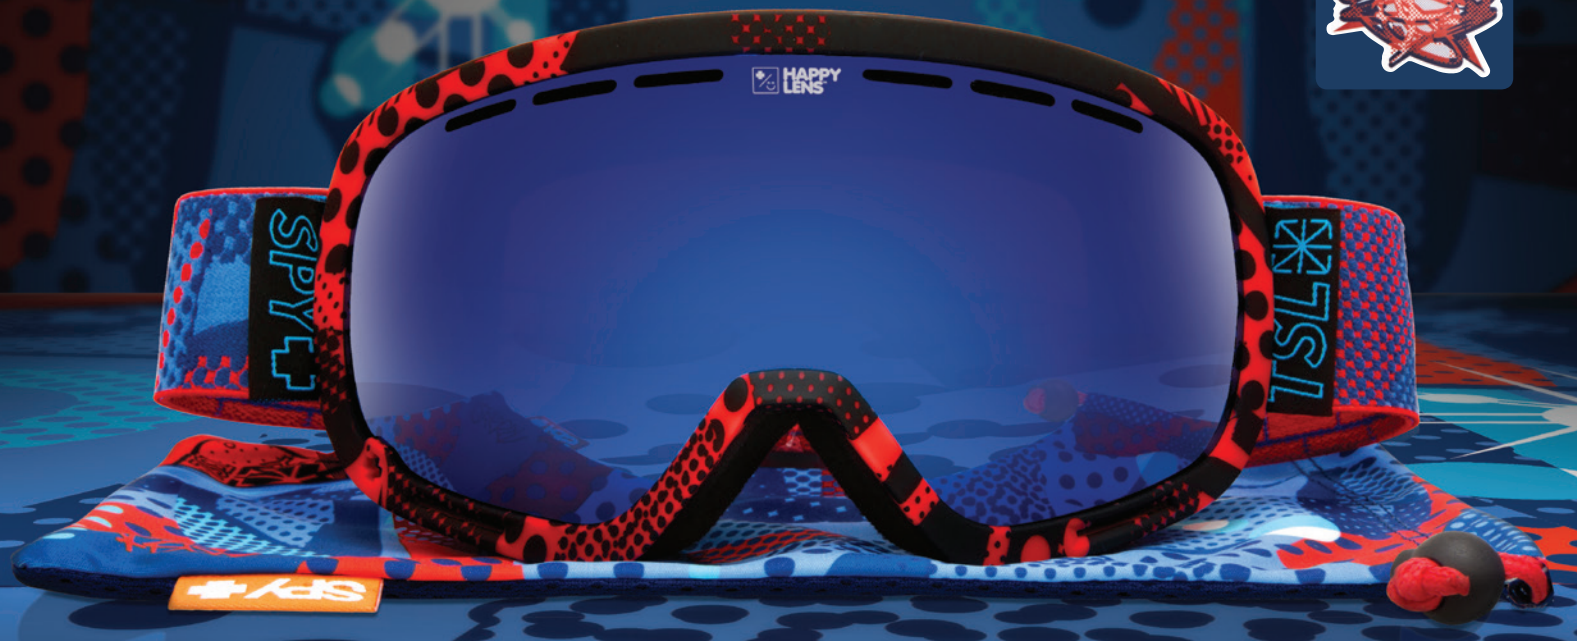

HELMET COMPATIBLE

Our goggle frames fit a wide variety of helmets, minimizing the space between eye and head protection.

Partnering for their seventh collaboration, the SPY + The Seventh Letter (TSL) goggle is a colorful neon splash of daring pop art, bold shapes, and strong lines, compliments of graffiti artist Vizie. From middle school to modern day, Vizie's wrist work at the wall has made him an artistic legend under the TSL name. Featured on the Marshall, Vizie's vivid colors and bright accents are sure to keep you poppin' in even the snowiest conditions.

BONUS PINE AIR FRESHENER

Collaborating with the dark and mysterious, nature-loving mystique of SPY's favorite snowboarding artist, Danny Larsen, our Marshall and Doom goggles have been transformed into a pointillism presentation where winter and nature mesh. When he's not shredding, Larsen takes to his pencil and pulls off some seriously detailed creations from the depths of his mind.

BONUS CUSTOM PIN

Teaming up with Colorado-based facemask company Phunkshun Wear, the custom SPY + Phunkshun Wear Marshall goggle reflects their attitude toward minimizing harmful impacts on the environment. Using yarn made out of recycled plastic water bottles (Repreve) for the custom strap, each goggle comes equipped with a bonus neck tube featuring matching graphics on the same eco-friendly material. Rep your love for the environment in a goggle that you'll surely reuse over and over again.

BONUS MATCHING NECK TUBE

Growing from our deep-rooted love of snowy winters, SPY is proud to continue its partnership with Protect Our Winters (POW) with the SPY + POW Ace snow goggle. Donating a portion of proceeds from every SPY + POW goggle sold, SPY will support POW's mission of engaging and mobilizing the winter sports community to lead the fight against climate change. Go to protectourwinters.org to learn more.

DOOM

LIGHT CONDITIONS EXPLAINED

- SUNNY** Darker lenses and strong mirrors shield your eyes from bright sun on those perfect bluebird days when SPF 30 is a must.
- MIXED** Lenses dark enough to shield your eyes from the sun offer increased contrast for when the sun decides to hide.
- FLAT** No sun, no problem. Specially tuned lenses with increased contrast aid visibility in your quest for powder on grey days.
- NIGHT** Night shredding requires clear lenses that shield your eyes from wind and chill while allowing full vision under the bright lights.

VLT (VISUAL LIGHT TRANSMISSION)

The higher the VLT, the more light that is transmitted through the lens.

FILTER CATEGORY

The higher the value, the less light that is transmitted through the lens.

SPECTRA™ LENS

Lenses contain multiple layers of mirror for a look that is equally unique as it is effective by reflecting glare in full sunshine.

LUCID LENS

Specially tuned lenses offer increased visibility and contrast enhancement in flat and low-light conditions.
